Ronald Senokoane

Junior Full-Stack Software Developer

South Africa | senokoaner@gmail.com | 068 701 2253
https://github.com/RonaldSenokoane | https://ronald-senokoane-portfolio.web.app

PROFESSIONAL SUMMARY

My path into software development has been shaped by solving practical problems for people. In banking and financial-services roles, I learned to listen carefully, work accurately with sensitive information, and support customers through important decisions.

At Tech Performance Center, my work combines administrative support with hands-on IT troubleshooting, software installation, and student-record administration. Alongside that experience, I am studying software development and building web applications with JavaScript, Node.js, and Firebase.

I am looking for a junior software engineering opportunity where I can keep learning, contribute dependable work, and build useful products with a collaborative team.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS
Frontend: React, Vite, React Router
Backend: Node.js, Express, REST APIs
Data & identity: MongoDB, Mongoose, Cloud Firestore, Firebase Authentication, JWT
Tools & delivery: Git, GitHub, Firebase Hosting, Cloudinary, Multer
Engineering practices: Role-based access, Protected endpoints, Record management, IT troubleshooting
